APPLICATIONS-BUILT

YouTube - React

- A web application built with React using YouTube's API that allows users to search and view YouTube videos without video advertisements.
- <https://github.com/mwalt09/YouTubeReact>

The Goods

- A marketplace for your unused items. Add items that you would like to list for rent and start making additional income from items that used to sit unused, or instead of buying an item you are only going to use once, just rent.
- <https://github.com/mwalt09/TheGoods>

Coffee-UP

- A mobile application that helps users select a coffee type based upon their survey results and routes them to a selection of local coffee shops using Google Maps API. For each survey result, the coffee selected is stored in Firebase for a persistent list of Top-3 results.
- Lead developer in the implementation of Google Maps functionality.
